2/18/98

Dear Hal,

Enclosed is a U.S. Money Order for "Frame-Up".

James S. Starr, Professor of Forensic Science at George Washington U. has gotten access to medical records that "could prove Hoover was Murdered."

This rumor was the basis for Anderson's best seller, "The Cannibal Manuscript." The reverse of the paperback has on its cover, "Who Killed J. Edgar Hoover?"

This is an oral rumor. Supposedly Felipe De Diego told a Harvard Crimson reporter that there were break-ins at Hoover's residence - then retracted his story. Summers team with it theorizing Edgar could have been killed

by theosophists.
Is this another weird theory, Hal?
I enclose these Web stories to illustrate the power the internet has.
On young people's most popular show, The X. Files, "Conrad Morn" kills both King and J.F.K.!
A lot of kids believe J.F.K. and R.F.K. were killed by ministate Government powers because they were about to go public on captured aliens. The program Dark Skies on a cable news program presents this as fact.
The Xanal Millennium generations showed them OFF the T.V. and go to the library.
In "Alien Agenda" Jim Morris implies Killgallon and Monroe were murdered because J.F.K. told Monroe about captured aliens.
On the televised Photographic Whitewash you said young people's minds were being destroyed OFF. This continues.
Jim Morris is a total but sincerely remarkable writer.

Sincerely,
